"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

of New France — their history, economy, society, and relations with the Aboriginal people and the British. This Canada lesson provides a teacher and student section with a variety of reading passages, activities, crossword, word search, and answer key to create a well-rounded lesson plan.

Why do we need government? As we have seen, people in groups have always had some form of government. Without it, we would have chaos. We would have no system of transportation, no hospitals, no police to protect us, no help for the elderly or those who cannot care for themselves. Following are some of the sections we will cover in this book: Canada's Coat of Arms, the Queen, the Parliament Buildings, our Federal Government, Canadian symbols, the Cabinet, the Senate, the right to vote, the Electoral Process, etc. Some activities include; a mock election, newscasts, research project, etc.

House of Commons Debates, Official Report

A connected world as imagined by early modern European artists, mapmakers, and writers, where Asia and the Americas were on a continuum America and Asia mingled in the geographical and cultural imagination of Europe for well over a century after 1492. Through an array of texts, maps, objects, and images produced between 1492 and 1700, this compelling and revelatory study immerses the reader in a vision of a world where Mexico really was India, North America was an extension of China, and South America was marked by a variety of biblical and Asian sites. It asks, further: What does it mean that the Amerasian worldview predominated at a time when Europe itself was coming into cultural self-definition? Each of the chapters focuses on a particular artifact, map, image, or book that illuminates aspects of Amerasia from specific European cultural milieus. Amerasia shows how it was possible to inhabit a world where America and Asia were connected either imaginatively when viewed from afar, or in reality when traveling through the newly encountered lands. Readers will learn why early modern maps regularly label Mexico as India, why the "Amazonas" region was named after a race of Asian female warriors, and why artifacts and manuscripts that we now identify as Indian and Chinese are entangled in European collections with what we now label Americana. Elizabeth Horodowich and Alexander Nagel pose a dynamic model of the world and of Europe's place in it that was eclipsed by the rise of Eurocentric colonialist narratives in the nineteenth and twentieth centuries. To rediscover this history is an essential part of coming to terms with the emergent polyfocal global reality of our own time.

The Rotarian

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

STAR-TIDES and Starfish Networks

This volume presents original writings and interviews with prominent thinkers on the front lines of an international intellectual effort to reconsider the fundamental terms of modernity and promote a philosophical design that reconsiders the significance of modernity itself.

Brexit will have significant consequences for the country, for Europe, and for global order. And yet much discussion of Brexit in the UK has focused on the causes of the vote and on its consequences for the future of British politics. This volume examines the consequences of Brexit for the future of Europe and the European Union, adopting an explicitly regional and future-oriented perspective missing from many existing analyses. Drawing on the expertise of 28 leading scholars from a range of disciplines, *Brexit and Beyond* offers various different perspectives on the future of Europe, charting the likely effects of Brexit across a range of areas, including institutional relations, political economy, law and justice, foreign affairs, democratic governance, and the idea of Europe itself. Whilst the contributors offer divergent predictions for the future of Europe after Brexit, they share the same conviction that careful scholarly analysis is in need – now more than ever – if we are to understand what lies ahead for the EU. Praise for *Brexit and Beyond* 'a wide-ranging and thought-provoking tour through the vagaries of British exit, with the question of Europe's fate never far from sight...Brexit is a wake-up call for the EU. How it responds is an open question—but respond it must. To better understand its options going forward you should turn to this book, which has also been made free online.' Prospect Magazine 'This book explores wonderfully well the bombshell of Brexit: is it a uniquely British phenomenon or part of a wider, existential crisis for the EU? As the tensions and complexities of the Brexit negotiations come to the fore, the collection of essays by leading scholars will prove a very valuable reference for their depth of analysis, their lucidity, and their outlining of future options.' - Kevin Featherstone, Head of the LSE European Institute, London School of Economics 'Brexit and Beyond is a must read. It moves the ongoing debate about what Brexit actually means to a whole new level. While many scholars to date have examined the reasons for the British decision to leave, the crucial question of what Brexit will mean for the future of the European project is often overlooked. No longer. *Brexit and Beyond* bundles the perspectives of leading scholars of European integration. By doing so, it provides a much needed scholarly guidepost for our understanding of the significance of Brexit, not only for the United Kingdom, but also for the future of the European continent.' - Catherine E. De Vries, Professor in the department of Government, University of Essex and Professor in the department of Political Science and Public Administration Free University Amsterdam 'Brexit and Beyond provides a fascinating (and comprehensive) analysis on the how and why the UK has found itself on the path to exiting the European Union. The talented cast of academic contributors is drawn from a wide variety of disciplines and areas of expertise and this provides a breadth and depth to the analysis of Brexit that is unrivalled. The volume also provides large amounts of expert-informed speculation on the future of both the EU and UK and which is both stimulating and anxiety-inducing.' -Professor Richard Whitman, Head of School, Professor of Politics and International Relations, Director of the Global Europe Centre, University of Kent
