[#advanced life support](#) [#ALS MCQ questions](#) [#medical quiz answers](#) [#paramedic practice test](#) [#critical care multiple choice](#)

Prepare for your medical exams with our comprehensive collection of advanced life support MCQ questions and answers. This resource is perfect for healthcare professionals seeking to test their knowledge in critical care and emergency medicine, covering key ALS protocols and essential clinical scenarios.

Each publication is designed to enhance learning and encourage critical thinking.

Thank you for stopping by our website.

We are glad to provide the document Als Mcq Questions you are looking for.

Free access is available to make it convenient for you.

Each document we share is authentic and reliable.

You can use it without hesitation as we verify all content.

Transparency is one of our main commitments.

Make our website your go-to source for references.

We will continue to bring you more valuable materials.

Thank you for placing your trust in us.

Thousands of users seek this document in digital collections online.

You are fortunate to arrive at the correct source.

Here you can access the full version Als Mcq Questions without any cost.

Advanced Life Support Mcq Questions Answers

AHA Pediatric Advanced Life Support (PALS) Practice Test with Answers - AHA Pediatric Advanced Life Support (PALS) Practice Test with Answers by Florida Training Academy 25,358 views Streamed 8 months ago 28 minutes - Test your knowledge with our free PALS Practice Test. The practice exam consists of **25 multiple-choice questions**, that are derived ...

You are called to help resuscitate an infant with severe symptomatic bradycardia associated with respiratory distress. The bradycardia persists despite establishment of an effective airway, oxygenation, and ventilation. There is no heart block present. Which of the following is the first drug you should administer?

General assessment of a 2-year-old female reveals her to be alert with mild breathing difficulty during inspiration. On primary assessment, she makes high-pitched inspiratory sounds (mild stridor) when agitated. Her oxygen level is 92% on room air. Lung auscultation reveals transmitted upper airway sounds with adequate distal breath sounds bilaterally. Which of the following is the most appropriate initial therapy intervention for this child?

You enter a room to perform a general assessment of a previously stable 10-year-old male and find him unresponsive and apneic. A code is called and bag-mask ventilation is performed with 100% oxygen. The cardiac monitor shows a wide-complex tachycardia. The boy has no detectable pulses. You deliver an unsynchronized shock with 2 Joules per kilogram and resume immediate CPR beginning with compressions. A team member had established 1.0. access, so you give a dose of epinephrine. At the next rhythm check, persistent Ventricular Fibrillation is present. You administer a 4 Joules per kilogram shock and resume CPR. Based on the PALS Pulseless Arrest Algorithm, what is the next drug to administer when CPR is restarted?

Parents of a 1-year-old female phoned the Emergency Response System when they picked up their daughter from the baby-sitter. Paramedics perform a general assessment revealing an obtunded infant with irregular breathing, bruises over the abdomen, abdominal distention, and cyanosis. Assisted bag-mask ventilation with 100% oxygen is initiated. The heart rate is 36 per minute, peripheral pulses cannot be palpated, and central pulses are barely palpable. Chest compressions are started with a 15.2 compression-to-ventilation ratio. In the emergency department the infant is intubated and

ventilated with 100% oxygen, and LV. access is established. The heart rate is now up to 150 beats minute but there are weak central pulses and no distal pulses. Systolic blood pressure is 74. Of the following, which would be most useful in management of this infant?

An infant with a history of vomiting and diarrhea arrives by ambulance. During your primary assessment the infant responds only to painful stimulation. The upper airway is patent, the respiratory rate is 40 with good bilateral breath sounds, and 100% oxygen is being administered. The infant has cool extremities, weak pulses, and a capillary refill time of more than 5 seconds. The infant's systolic blood pressure is 85, and bedside glucose level is 30. Which of the following is the most appropriate treatment to provide for this infant?

General assessment of a 9-year-old male with increased work of breathing. reveals the boy to be agitated and leaning forward on the bed with obvious respiratory distress. You administer 100% oxygen by nonbreathing mask. The patient is speaking in short phrases and tells you that he has asthma but does not carry an inhaler. He has nasal flaring, severe suprasternal and intercostal retractions, and decreased air movement with prolonged expiratory time and wheezing. His oxygen level is 92% on a nonbreathing mask. What is the next medical therapy to provide to this patient?

An 8-month-old male is brought to the emergency department for evaluation of severe diarrhea and dehydration. In the E.D. the child becomes unresponsive and pulseless. You shout for help and start CPR at a compression rate of 100 per minute and a compression-to-ventilation ratio of 30:2. Another provider arrives, at which point you switch to 2. rescuer CPR with a compression-to-ventilation ratio of 15:2. The cardiac monitor shows Ventricular Fibrillation.

General assessment of a 10-month-old male in the emergency department reveals a lethargic pale infant with slow respirations. You begin assisted ventilation with a bag-mask device using 100% oxygen. On primary assessment heart rate is 38, central pulses are weak but distal pulses cannot be palpated, systolic blood pressure is 60, and capillary refill is 4 seconds. During your assessment a colleague places the child on a cardiac monitor, and you observe a bradycardic rhythm. The rhythm remains unchanged despite ventilation with 100% oxygen. What are your next management steps?

A 3-year-old unresponsive, apneic child is brought to the emergency department. Emergency personnel report that the child became unresponsive as they arrived at the hospital. The child is receiving CPR, including bag-mask ventilation with 100% oxygen and chest compressions at a rate of 100 per minute. Compressions and ventilations are being coordinated at a ratio of 15:2. You confirm that apnea is present and that ventilation is producing bilateral breath sounds and chest expansion while a colleague confirms absent pulses. Cardiac monitor shows Ventricular Tachycardia.

General assessment of a 10-year-old male shows him to be unresponsive. You shout for help, check breathing, find he is apneic, and give 2 breaths. After finding that he is pulseless, you begin cycles of compressions and ventilations with a compression rate of 100 per minute and compression-to-ventilation ratio of 30:2. A colleague arrives and places the child on a cardiac monitor, revealing Ventricular Fibrillation.

A child becomes unresponsive in the emergency department and is not breathing. You provide ventilation with 100% oxygen. You are uncertain if a faint pulse is present. What is your next action? You are preparing to use a manual defibrillator and paddles in the pediatric setting. When would it be most appropriate to use the smaller "pediatric" sized paddles for shock delivery?

A 7-year-old boy is found unresponsive, apneic, and pulseless. CPR is ongoing. The child is intubated and vascular access is established. The heart monitor reveals an organized rhythm, but a pulse check reveals no palpable pulses. Effective ventilations and compressions are resumed, and an initial I.V. dose of epinephrine is administered. Which of the following therapies should you perform next?

You are evaluating an irritable 6-year-old girl with mottled color. On primary assessment she is febrile with a temperature of 40 degrees Celsius or 104 degrees Fahrenheit. Her extremities are cold with a capillary refill of 5 seconds. Distal pulses are absent and central pulses are weak. Heart rate is 180 per minute, respiratory rate is 45 breaths per minute, and a systolic blood pressure is 98. Which of the following most accurately describes the categorization of this child's condition using the terminology taught in the PALS Provider Course?

An 18-month-old child presents with a 1-week history of cough and runny nose. You perform a general assessment, which reveals a toddler responsive only to painful stimulation with slow respirations and diffuse cyanosis. You begin a primary assessment and find that the child's respiratory rate has fallen from 65 breaths per minute to 10. Severe inspiratory intercostal retractions are present. The heart rate is 160, oxygen level is 65% on room air, and the capillary refill is less than 2 seconds. Which of the following is the most appropriate immediate treatment for this toddler?

You are supervising another healthcare provider who is inserting an intraosseous needle into an infant's tibia. Which of the following signs should you tell the provider is the best indication of

successful insertion of a needle into the bone marrow cavity?

#24: A pale and obtunded 3-year-old child with a history of diarrhea is brought to the hospital. Primary assessment reveals a respiratory rate of 45 breaths per minute with good breath sounds bilaterally. Heart rate is 150 beats per minute, systolic blood pressure is 90, and the oxygen level is 92% in room air. Capillary refill is 5 seconds and peripheral pulses are weak. After placing the child on a nonbreathing face mask with 100% oxygen and obtaining vascular access, which of the following is the most appropriate immediate treatment for this child?

2023 Practice Basic Life Support (BLS) Questions with Answers - 2023 Practice Basic Life Support (BLS) Questions with Answers by Florida Training Academy 128,362 views 10 months ago 7 minutes, 30 seconds - American Heart Association BLS **Exam**, Practice **Questions**, To help you get started, we have included a small set of BLS practice ...

2023 Practice Basic Life Support Exam with Answers

Which of the following is NOT a part of the Basic Life Support algorithm?

When performing C.P.R., what is the recommended compression rate?

What is the recommended depth for chest compressions on an adult?

Which of the following is a common cardiac arrest?

What is the first step in the BLS algorithm?

When assessing for a pulse, how long should you check before determining that there is none present?

Which of the following is the recommended compression-to-ventilation ratio for BLS in adults?

A child is not breathing and does not have a pulse. You do not know the time of his arrest. When should you call for advanced medical personnel during BLS?

When performing BLS on an infant, what is the recommended depth for chest compressions?

Which of the following is NOT a potential cause of cardiac arrest?

When should an automated external defibrillator (A.E.D.) be used during Basic Life Support?

What is the correct hand placement for performing chest compressions on an adult?

2023 AHA ACLS Practice Test with Answers - Pass the Mega Code - 2023 AHA ACLS Practice Test with Answers - Pass the Mega Code by Florida Training Academy 71,260 views Streamed 8 months ago 18 minutes - Test your knowledge with our free ACLS Practice Test. The practice exam consists of 25 **multiple-choice questions**, that are ...

Intro

A patient with S.T. segment elevation Myocardial Infarction has ongoing chest discomfort. Fibrinolytic therapy has been ordered. Heparin 4000 units I.V. bolus was administered, and a heparin infusion of 1000 units per hour is being administered. Aspirin was not taken by the patient because he had a history of gastritis treated 5 years ago. Your next action is to

A patient has sinus bradycardia with a heart rate of 36 beats per minute. Atropine has been administered to a total of 3 milligrams. A transcutaneous pacemaker has failed to capture. The patient is confused, and her systolic blood pressure is 110. Which of the following is now indicated?

A 62-year-old man suddenly experienced difficulty speaking and left-side weakness. He was brought to the emergency department. He meets initial criteria for fibrinolytic therapy, and a C.T. scan of the brain is ordered. What are the guidelines for antiplatelet and fibrinolytic therapy?

A patient with a possible S.T. segment elevation Myocardial Infarction has ongoing chest discomfort. Which of the following would be a contraindication to the administration of nitrates?

A patient is in cardiac arrest. Ventricular fibrillation has been refractory to a second shock. Of the following, which drug and dose should be administered first?

A 35-year-old woman has palpitations, light-headedness, and a stable tachycardia. The monitor shows a regular narrow-complex tachycardia at a rate of 180 per minute. Vagal maneuvers have not been effective in terminating the rhythm. An I.V. has been established. What drug should be administered?

A patient with sinus bradycardia and heart rate of 42 has diaphoresis and a systolic blood pressure of 80. What is the initial dose of atropine based on the current A.C.L.S. guidelines?

A patient is in refractory ventricular fibrillation and has received multiple appropriate defibrillation shocks, epinephrine 1 milligram I.V. twice, and an initial dose of 300 milligram amiodarone L.V. The patient is intubated. A second dose of amiodarone is now called for. The recommended second dose

A patient with a possible acute coronary syndrome has ongoing chest discomfort unresponsive to 3 sublingual nitroglycerin tablets. There are no contraindications, and 4 milligrams of morphine sulfate was administered. Shortly afterward, the systolic blood pressure falls to 88, and the patient has increased chest discomfort. You should

A patient has a rapid irregular wide-complex tachycardia. The ventricular rate is 138 per minute. The

patient is asymptomatic with a systolic blood pressure of 110. He has a history of angina. Which of the following actions is recommended?

You arrive on the scene with the code team. High-quality C.P.R. is in progress. An A.E.D. has previously advised "no shock indicated." A rhythm check now finds asystole. After resuming high-quality compressions, your next action is to

A patient is in pulseless ventricular tachycardia. Two shocks and 1 dose of epinephrine have been given. Which is the next drug/dose to anticipate

Your patient has been intubated. Intravenous access has been unsuccessfully attempted twice. Which of the following is also an acceptable route for drug administration during a code?

A patient is in cardiac arrest. Ventricular fibrillation has been refractory to an initial shock. What is the recommended route for drug administration during CPR?

A patient is in refractory ventricular fibrillation. High-quality CPR is in progress, and shocks have been given. One dose of epinephrine was given after the second shock. An antiarrhythmic drug was given immediately after the third shock. What drug should the team leader request to be prepared for administration next?

A 57-year-old woman has palpitations, chest discomfort, and tachycardia. The monitor shows a regular wide-complex tachycardia at a rate of 180 beats per minute. She becomes diaphoretic, and her blood pressure is 80 over 60. The next action is to

A patient is in cardiac arrest. High-quality chest compressions are being given. The patient is intubated and an I.V. has been started. The rhythm is asystole. Which is the first drug/dose to administer?

A 45-year-old woman with a history of palpitations develops light-headedness and palpitations. She has received adenosine 6 milligrams for the rhythm shown above without conversion of the rhythm. She is now extremely apprehensive. Her Blood pressure is 108 over 70. What is the next appropriate intervention?

#22: A patient in the emergency department develops recurrent chest discomfort suspicious for ischemia. Oxygen is being administered via a nasal device at 4 Liters per minute, and an I.V. line is in place. The systolic blood pressure is 160. There are no allergies or contraindications to any medication. You would first order

Following initiation of CPR and 1 shock, Ventricular fibrillation persists. A second shock is given and chest compressions are resumed immediately. An I.V. is in place and no drugs have been given.

Bag-mask ventilations are producing visible chest rise. What is your next order?

You arrive on the scene to find a 56-year-old diabetic woman with dizziness. She is pale and diaphoretic. Her systolic blood pressure is 80. The cardiac monitor shows a brady arrhythmia. The Client is receiving oxygen at 4 Liters per minute and an I.V. has been established. Your next order is

Basic Life Support (BLS) Questions with Answers | Earn Your BLS Card by Florida Training Academy 81,626 views Streamed 7 months ago 35 minutes - Study Guide for the American Heart Association

Basic Life Support, (BLS) Examination with Nurse Eunice and Florida Training ...

You work with an overweight 55-year-old dentist with no known history of heart disease. He begins to complain of sudden, severe, "crushing" pain under his breastbone, in the center of his chest. The pain has lasted more than 5 minutes. What problem should you think of right away, and what should you do?

You witnessed the collapse of a 45-year-old man. You are now performing CPR after sending someone to phone 911. You have done your best to ensure that the first 2 links in the Chain of Survival have been completed immediately. What is the third link in the chain, which will have the greatest effect on increasing this man's chance of survival?

You have been talking with a 60-year-old man. He is alert and has been conversing normally. All at once he complains of a sudden weakness on one side of his face and in one arm. He is also having trouble speaking. What is the most likely cause of his problem?

You remove a 3-year-old from the bottom of the shallow end of a swimming pool. You find that she is limp and unresponsive. No other person is available to help. When should you phone 911?

45: You are a medical advisor helping set up a public access defibrillation (PAD) program at a local shopping mall. The mall has purchased an AED. The mall personnel director asks, "If AEDs are so foolproof, why do the security guards have to learn CPR and be trained to use the AED?" Which of

the following is the best explanation for the need to train rescuers to perform CPR and use an AED?
Before providing rescue breathing for an unresponsive victim, you must check for breathing. You do this by listening and feeling for airflow through the victim's nose or mouth and by
You are in the hospital cafeteria, where a woman appears to be in distress. She is grasping her throat with both hands. What should you do to find out if she is choking?
You are providing rescue breathing for a child using a bag-mask device. What action will confirm that each of your rescue breaths is adequate?
A child is gasping for breath but has a pulse rate of 100 per minute. The rescuers should
A child is not breathing but has a pulse rate of 50 per minute. The rescuers should: A. Start CPR beginning with compressions. B. Give 1 breath every 6 seconds.
A 70-year-old man who has been eating steak in a restaurant abruptly stands up and grabs his neck. The rescuer determines that the victim is choking. The best response is to
An infant who had been choking becomes unresponsive. The rescuer should
In which of the following situations is moving a patient during CPR appropriate?

It Can Find the Right Buyer for Your Home and Provide You with All the Money You Need and the Financial Freedom To Be Due and Go as Your Heart Desires It Is Your Right To Discover this Inner World of Thought Feeling and Power of Light Love and Beauty though Invisible Its Forces Are Mighty within Your Subconscious Mind You Will Find the Solution for every Problem and the Cause for every Effect because You Can Draw Out the Hidden Powers You Come into Actual Possession of the Power

and Wisdom Necessary To Move Forward in Abundance Security Joy and Dominion I Have Seen the Power of the Subconscious Lifts

You Come into Actual Possession of the Power and Wisdom Necessary To Move Forward in Abundance Security Joy and Dominion I Have Seen the Power of the Subconscious Lifts People Up out of Crippled States Making Them Whole Vital and Strong Once More and Free To Go Out into the World To Experience Happiness Health and Joyous Expression There Is a Miraculous Healing Power in Your Subconscious That Can Heal the Troubled Mind and the Broken Heart It Can Open the Prison Door of the Mind and Liberate You It Can Free You from all Kinds of Material and Physical Bondage Necessity of a Working Basis Substantial Progress in any Field of Endeavor Is Impossible in the Absence of a Working Basis

That Can Heal the Troubled Mind and the Broken Heart It Can Open the Prison Door of the Mind and Liberate You It Can Free You from all Kinds of Material and Physical Bondage Necessity of a Working Basis Substantial Progress in any Field of Endeavor Is Impossible in the Absence of a Working Basis Which Is Universal in Its Application You Can Become Skilled in the Operation of Your Subconscious Mind You Can Practice Its Powers with a Certainty of Results in Exact Proportion to Your Knowledge of Its Principles and to Your Application of Them for Definite Specific Purposes and Goals You Wish To Achieve

Mind You Can Practice Its Powers with a Certainty of Results in Exact Proportion to Your Knowledge of Its Principles and to Your Application of Them for Definite Specific Purposes and Goals You Wish To Achieve Being a Former Chemist I Would Like To Point Out that if You Combine Hydrogen and Oxygen in the Proportions of Two Atoms of the Former to One of the Latter Water Would Be the Result You Are Very Familiar with the Fact that One Atom of Oxygen and One Atom of Carbon Will Produce Carbon Monoxide a Poisonous Gas but if You Add another Atom of Oxygen

You Must Not Think that the Principles of Chemistry Physics and Mathematics Differ from the Principles of Your Subconscious Mind Let Us Consider a Generally Accepted Principle Water Seeks Its Own Level this Is a Universal Principle Which Is Applicable to Water Everywhere Consider another Principle Matter Expands When Heated this Is True Anywhere at any Time and under all Circumstances You Can Heat a Piece of Steel and It Will Expand Regardless whether the Steel Is Found in China England or India

It Is a Universal Truth That Matter Expands When Heated It Is Also a Universal Truth that Whatever You Impress on Your Subconscious Mind Is Expressed on the Screen of Space as Conditioned Experience and Event Your Prayer Is Answered because Your Subconscious Mind Is Principle and by Principle I Mean the Way a Thing Works for Example the Principle of Electricity Is that It Works from a Higher to a Lower Potential if You Do Not Change the Principle of Electricity When You Use It but by Cooperating with Nature You Can Bring Forth Marvelous Inventions and Discoveries Which Bless Humanity in Countless Ways Your Subconscious Mind Is Principle

This Means To Believe in the Way Your Mind Works To Believe in Belief Itself the Belief of Your Mind Is the Thought of Your Mind That Is Simple Just that and Nothing Else All Your Experiences Events Conditions and Acts Are the Reactions of Your Subconscious Mind to Your Thoughts Remember It Is Not the Thing Believed in but the Belief in Your Own Mind Which Brings about the Resolve Sees Believing in the False Beliefs Opinions Superstitions and Fears of Mankind Begin To Believe in the Eternal Verities and Truths of Life Which Never Change Then You Will Move Onward Upward and Godward Whoever Reads this Book and Applies the Principles of the Subconscious Mind Herein Set Forth Will Be Able To Pray Scientifically and Effectively for Himself and for Others Your Prayer Is Answered According to the Universal Law of Action and Reaction

The Two Is Well Known to all Thinking Men and Women Today the Two Functions of Your Mind Are Essentially unlike each Is Endowed with Separate and Distinct Attributes and Powers the Nomenclature Generally Used To Distinguish the Two Functions of Your Mind Is as Follows the Objective and Subjective Mind the Conscious and Subconscious Mind the Waking and Sleeping Mind the Surface Self and the Deep Self the Voluntary Mind and the Involuntary Mind the Male and the Female and Many Other Terms You Will Find the Terms Conscious and Subconscious Used To Represent the Dual Nature of Your Mind throughout this Book the Conscious and Subconscious Minds an Excellent Way To Get Acquainted with the Two Functions of Your Mind Is To Look upon Your Own Mind as a Garden You Are a Gardener

Every Thought Is There for a Cause and every Condition Is an Effect for this Reason It Is Essential that You Take Charge of Your Thoughts so as To Bring Forth Only Desirable Conditions When Your Mind Thinks Correctly When You Understand the Truth When the Thoughts Deposited in Your Subconscious Mind Are Constructive Harmonious and Peaceful the Magic Working Power of Your Subconscious Will Respond and Bring About Harmonious Conditions Agreeable Surroundings and

the Best of Everything When You Begin To Control Your Thought Processes You Can Apply the Powers of Your Subconscious

Law Which Governs all Things Look around You Wherever You Live and You Will Notice that the Vast Majority of Mankind Lives in the World without the More Enlightened Men Are Intensely Interested in the World within It Is the World within Namely Your Thoughts Feelings and Imagery That Makes Your World without It Is Therefore the Only Creative Power and Everything Which You Find in Your World of Expression Has Been Created by You in the Inner World of Your Mind Consciously or Unconsciously Knowledge of the Interaction of Your Conscious and Subconscious Minds Will Enable You To Transform Your Whole Life in Order To Change External Conditions You Must Change the Cause

You Must Remove the Cause and the Cause Is the Way You Are Using Your Conscious Mind in Other Words the Way You Are Thinking and Picturing in Your Mind You Are Living in a Fathomless Sea of Infinite Riches Your Subconscious Is Very Sensitive to Your Thoughts Your Thoughts Form the Mold or Matrix through Which the Infinite Intelligence Wisdom Vital Forces and Energies of Your Subconscious Flow the Practical Application of the Laws of Your Mind as Illustrated in each Chapter of this Book Will Cause You To Experience Abundance for Poverty Wisdom for Superstition and Ignorance Peace for Pain Joy for Sadness Light for Darkness Harmony for Discord Faith and Confidence for Fear Success for Failure and Freedom from the Law of Averages

The Practical Application of the Laws of Your Mind as Illustrated in each Chapter of this Book Will Cause You To Experience Abundance for Poverty Wisdom for Superstition and Ignorance Peace for Pain Joy for Sadness Light for Darkness Harmony for Discord Faith and Confidence for Fear Success for Failure and Freedom from the Law of Averages Certainly There Can Be no More Wonderful Blessing than these from a Mental Emotional and Material Standpoint Most of the Great Scientists Artists Poets Singers Writers and Inventors Have a Deep Understanding of the Workings of the Conscious

He Said They Will Laugh at Me I Can't Sing Then He Shouted in the Presence of those behind the Stage the Little Me Wants To Strangle the Big Me within He Said to the Little Me Get out of Here the Big Me Wants To Sing through Me by the Big Me He Meant the Limitless Power and Wisdom of His Subconscious Mind and He Began To Shout Get Out Get Out the Big Me Is Going To Sing His Subconscious Mind Responded Releasing the Vital Forces within Him When the Call Came He Walked Out on the Stage

The Little Me Wants To Strangle the Big Me within He Said to the Little Me Get out of Here the Big Me Wants To Sing through Me by the Big Me He Meant the Limitless Power and Wisdom of His Subconscious Mind and He Began To Shout Get Out Get Out the Big Me Is Going To Sing His Subconscious Mind Responded Releasing the Vital Forces within Him When the Call Came He Walked Out on the Stage and Sang Gloriously and Majestically Enthralling the Audience It Is Obvious to You Now that Caruso Must Have Understood the Two Levels of the Mind the Conscious or Rational and the Subconscious

The Subconscious Is Subject to the Conscious Mind and that Is Why It Is Called Subconscious or Subjective Outstanding Differences and Modes of Operation You Will Perceive the Main Differences by the Following Illustrations the Conscious Mind Is like the Navigator or a Captain at the Bridge of a Ship He Directs the Ship and Signals Orders to Men in the Engine Room Who in Turn Control All the Boilers Instruments Gauges Etc the Men in the Engine Room Do Not Know Where They Are Going They Follow Orders They Would Go on the Rocks if the Man on the Bridge Issued Faulty or Instructions Based on His Findings with the Compass Sextant

She Was About To Say I **Can**, 't Afford that Bag When ...

She Said that Bag Is Mine It Is for Sale I Accept It Mentally and My Subconscious Sees to It That I Receive It at Eight O'clock Christmas Eve Her Fiance Presented Her with a Bag Exactly the Same as the One She Had Looked at and Mentally Identified Herself with at Ten O'clock the Same Morning She Had Filled Her Mind with the Thought of Expectancy and Released the Whole Thing to Her Deeper Mind Which Has the Know-How of Accomplishment this Young Girl a Student of the University of Southern California Said to Me I Didn't Have the Money To Buy that Bag

She Drinks Coffee Her Subconscious Mind Nudges Her as if To Say the Boss Wants You To Stay Awake Tonight Your Subconscious Mind Works 24 Hours a Day and Makes Provisions for Your Benefit Pouring All the Fruit of Your Habitual Thinking into Your Lap How Her Subconscious Mind Responded a Woman Wrote Me a Few Months Ago as Follows I Am 75 Years Old a Widow with a Grown Family I Was Living Alone and on a Pension I Heard Your Lectures on the Powers of the Subconscious Mind Wearing You Said that Ideas Could Be Conveyed to the Subconscious Mind by Repetition Faith and Expectancy I Began To Repeat Frequently with Feeling I Am Wanted I Am Happily Married to a Kind

Loving

He Was a Perfect Answer to My Prayer within a Week He Proposed to Me and Now We Are on Our Honeymoon in Europe I Know that the Intelligence within My Subconscious Mind Brought both of Us Together in Divine Order this Woman Discovered that the Treasure House Was within Her Her Prayer Was Felt as True in Her Heart and Her Affirmation Sank Down by Osmosis into Her Subconscious Mind Which Is the Creative Medium the Moment She Succeeded in Bringing About a Subjective Embodiment Her Subconscious Mind Brought About the Answer through the Law of Attraction Her Deeper Mind Full of Wisdom and Intelligence Brought both of Them Together in Divine Order Be Sure that You Think on Whatsoever

It Works by Association of Ideas and Uses every Bit of Knowledge That You Have Gathered in Your Lifetime To Bring about Its Purpose It Draws on the Infinite Power Energy and Wisdom within You It Lines Up All the Laws of Nature To Get Its Way Sometimes It Seems To Bring About an Immediate Solution to Your Difficulties but at Other Times It Takes Days Weeks or Longer It Sways Our Past Finding Out Conscious and Subconscious Terms Differentiated You Must Remember that these Are Not Two Minds They Are Merely Two Spheres of Activity within One Mind Your Conscious Mind Is the Reasoning Mind It Is that Phase of Mine Which Chooses

The Habitual Thinking of Your Conscious Mind Establishes Deep Grooves in Your Subconscious Mind this Is Very Favorable for You if Your Habitual Thoughts Are Harmonious Peaceful and Constructive if You Have Indulged in Fear Worry and Other Destructive Forms of Thinking the Is To Recognize the Omnipotence of Your Subconscious Mind and to Creedal Happiness and Perfect Health Your Subconscious Mind Being Creative and One with Your Divine Source Will Proceed To Create the Freedom and Happiness Which You Have Earnestly Decreed

As You Know Your Subconscious Mind Does Not Make Comparisons or Contrasts neither Does It Reason and Think Things Out for Itself this Latter Function Belongs to Your Conscious Mind It Simply Reacts to the Impressions Given to It by Your Conscious Mind It Does Not Show a Preference for One Course of Action over Another the Following Is a Classic Example of the Tremendous Power of Suggestion Suppose You Approach a Timid Looking Passenger on Board Ship and Say to Him Something like this You Look Very Ill How Pale You Are I Feel Certain You Are Going To Be Seasick Let Me Help You to Your Cabin this Passenger Turns Pale Your Suggestion of Seasickness Associates According to His Temperament He either Laughs at Your Joke or Expresses a Mild Irritation Your Suggestion Fell on Deaf Ears in this Instance because Your Suggestion of Seasickness Was Associated in His Mind with His Own Immunity from It Therefore It Caught Up Not Fear or Worry but Self-Confidence the Dictionary Says that a Suggestion Is the Act or Instance of Put Something into One's Mind the Mental Process by Which the Thought or Idea Suggested Is Entertained Accepted or Put into Effect You Must Remember that a Suggestion CanNot Impress Something on the Subconscious Mind against the Will of the Conscious Mind in Other Words Your Conscious Mind Has the Power To Reject the Suggestion Given in the Case of the Sailor

You Must Remember that a Suggestion CanNot Impress Something on the Subconscious Mind against the Will of the Conscious Mind in Other Words Your Conscious Mind Has the Power To Reject the Suggestion Given in the Case of the Sailor He Had no Fear of Seasickness He Had Convinced Himself of His Immunity and the Negative Suggestion Had Absolutely no Power To Evoke Fear the Suggestion of Seasickness to the Other Passenger Called Forth His Indwelling Fear of Seasickness each of Us Has His Own Inner Fears Beliefs Opinions
